CLOCK PARTS

INTRODUCTION

HISTORY: Clocks have a long and glorious history. Mankind has measured time in many ways but the invention of clock-work using controlled wheels and gearing represented a major human achievement. Brass ornamentation, added to clocks of all types for many centuries and usually silvered or gilded, has been used to emphasise and celebrate the importance of a timepiece. As furniture, clocks have always projected the design differences between national cultures and periods in a way not equalled by most other types of furniture

ORIGINS: Most of the parts shown through this catalogue were first made as copies from originals sent to us by our customers and are faithfull lost-wax replicas of period originals.

USING THE CATALOGUE: A contents page follows to help you to the right pages. All clock parts are shown as true to life size as possible in the printed version. Full measurements are also given for the convenience of those looking at a PDF download. As the majority of the clock parts in this supplement are made to order we **strongly** recommend that you purchase an initial sample (if you are in doubt as to whether the item will suit your purpose) before making a decision about a larger order. Some items are held in stock, and through the catalogue you will see each of these shown with their Main Catalogue order code in brackets and you can search for these on our website. All multiple component items are sold fully assembled - our ball and spire finials are assembled traditionally with a threaded rod linking through from the spire to the base. Fixing screws or pins can also be ordered with a matching finish for those items that need them.

1748L

each top edge to corner
40mm (1 9/16”)
height 33mm (1 5/16”)
width across paw 28mm (1 1/8”)

1675L

each top edge to corner
54mm (2 1/8”)
height 25mm (1”)
width across paw 30mm (1 3/16”)

6861L

each top edge to corner
79mm (3 1/8”)
height 39mm (1 9/16”)
width across paw 22mm (7/8”)

DECORATIVE BRACKET FEET

2821L

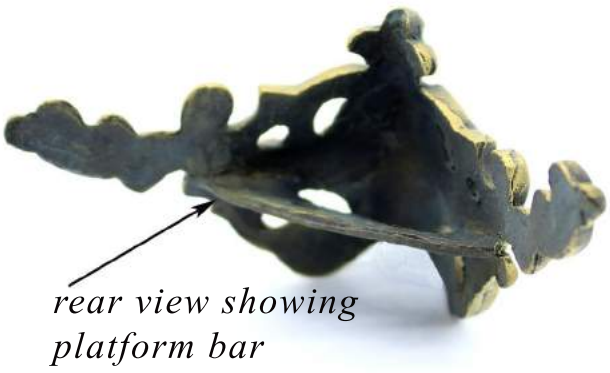
each top edge to corner 24mm (15/16")
height 14mm (9/16")
NB cast without screw holes

2194L

has platform positioned half way up height

from corner to each end
56mm (2 1/4")
overall height 61mm (2 7/16")
would give lift of (ie height to platform) of 29mm (1 1/8")

8090L



rear view showing platform bar

from near front corner to each end
61mm (2 7/16")
overall height 43mm (1 11/16")
would give lift of (ie height to platform) of 26mm (1 1/16")

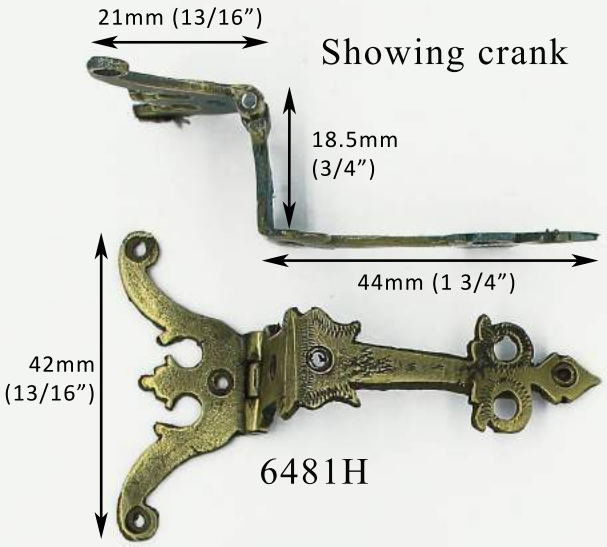
1034L

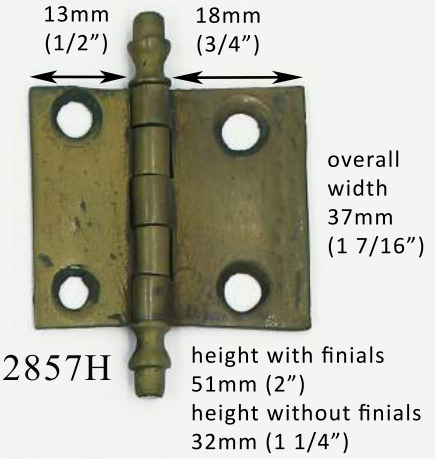
from corner to each edge:
46mm (1 13/16") - left side
49mm (1 15/16") - right side
overall height 26mm (1 1/16")

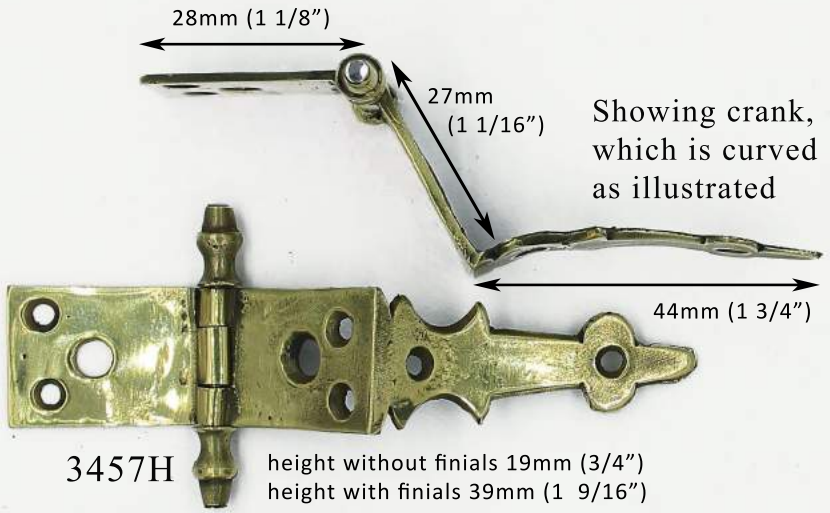
from corner to each end 100mm (4")
overall height 69mm (2 3/4")
would give lift of (ie height to
platform) of 57mm (2 1/4")

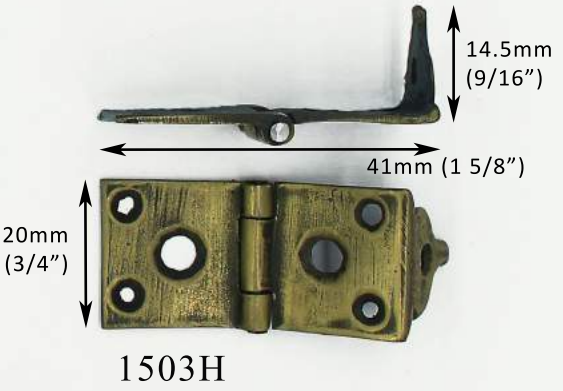
6219L

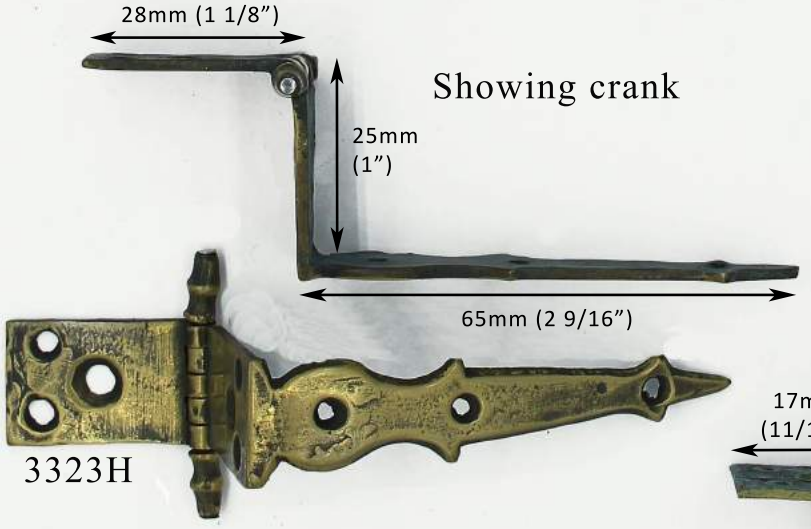
LONG CASE CLOCK HINGES

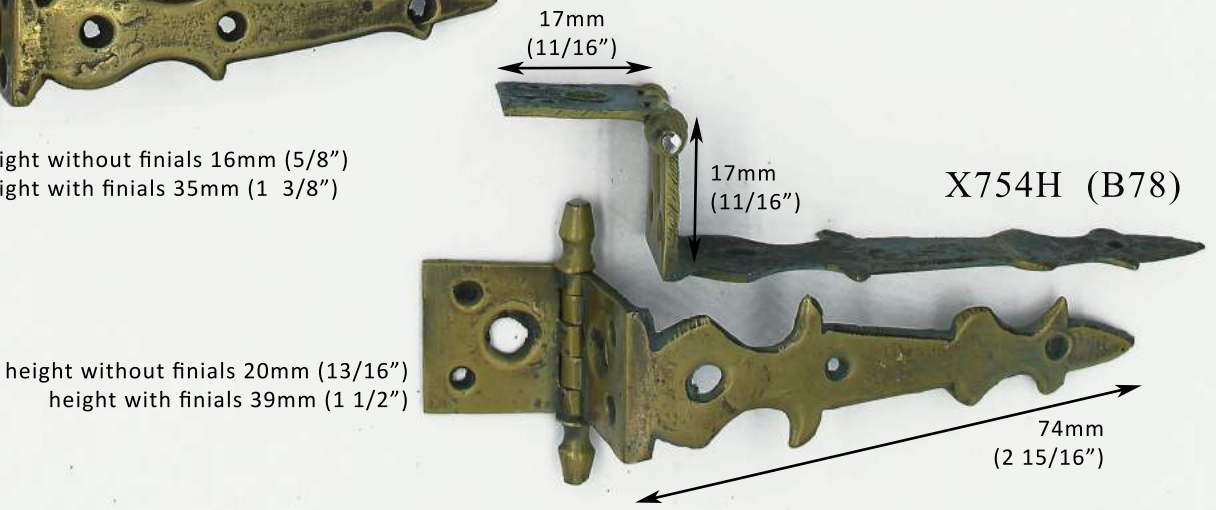


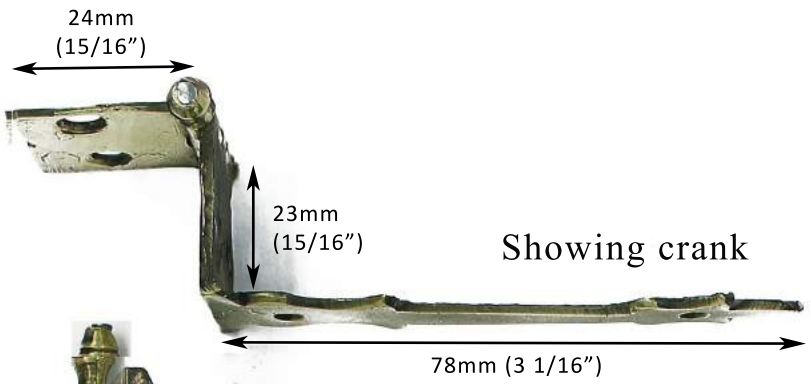












3037H

height without finials 24mm (15/16")
height with finials 43mm (1 11/16")

3626H

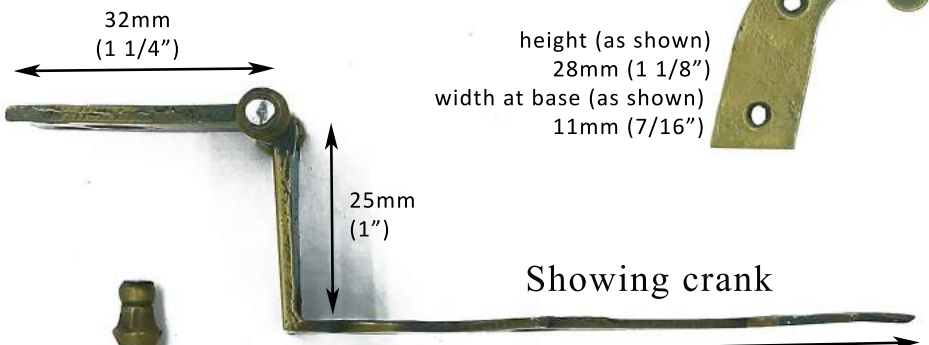
height (as shown)
37mm (1 7/16")
width at base (as shown)
5mm (3/16")

2993AH

height (as shown)
28mm (1 1/8")
width at base (as shown)
11mm (7/16")

2993BH

height (as shown)
29mm (1 3/16")
width at base
(as shown)
14mm (9/16")



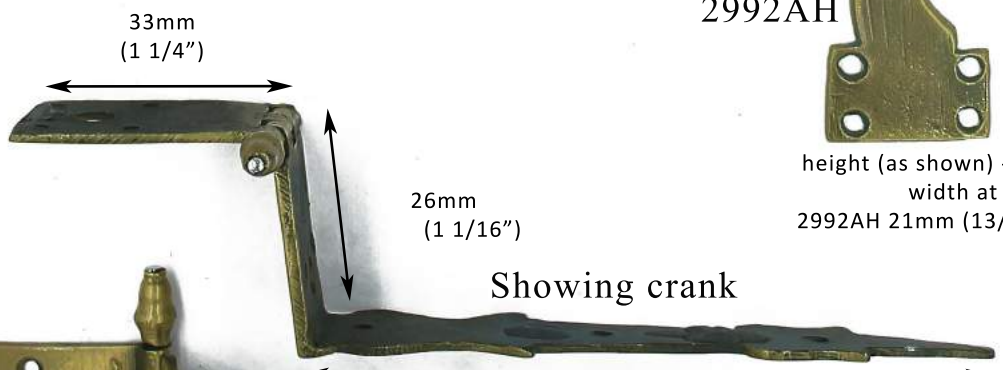
6339H

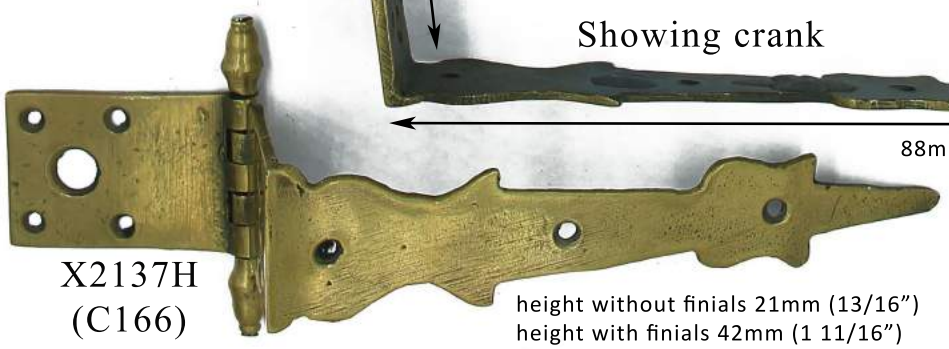
height without finials 22mm (7/8")
height with finials 48mm (1 7/8")

2992AH

2992BH

height (as shown) - for both - 39mm (1 9/16")
width at base (as shown):
2992AH 21mm (13/16"), 2992BH 22mm (7/8")





X2137H
(C166)

height without finials 21mm (13/16")
height with finials 42mm (1 11/16")

8296H

height (as shown)
35mm (1 3/8")
width of base
27mm (1 1/16")

CLOCK CARRYING HANDLES

F157L

overall height 27mm (1 1/16")
max. width 34mm (1 5/16")
block width 8mm (5/16")

this handle is cast without fixing threads which can be added to required specifications, please ask for a quote

X3543L (C165)

overall height 52mm (2 1/16")
max. width 74mm (2 15/16")
block width 11mm (7/16")

this handle is cast without fixing threads which can be added to required specifications, please ask for a quote

3833A/6490L

overall height (exc. threads) 57mm (2 1/4")
max. width 88mm (3 1/2")
block width 19mm (3/4")

this handle, assembled as shown, has a block which is cast with fixing threads at 40mm (1 5/8") length and 44mm (1 3/4") centre to centre

a block to sit over a shallow curve is also available - please enquire with item reference 3833BL for more information

8242L

overall height (exc. thread)
52mm (2 1/16")
max. width 87mm (3 7/16")
block width 15mm (5/8")

this handle is cast with a
single fixing thread as shown
of 53mm (2 1/8") length

F148L

handle pivots on
ball and socket assembly

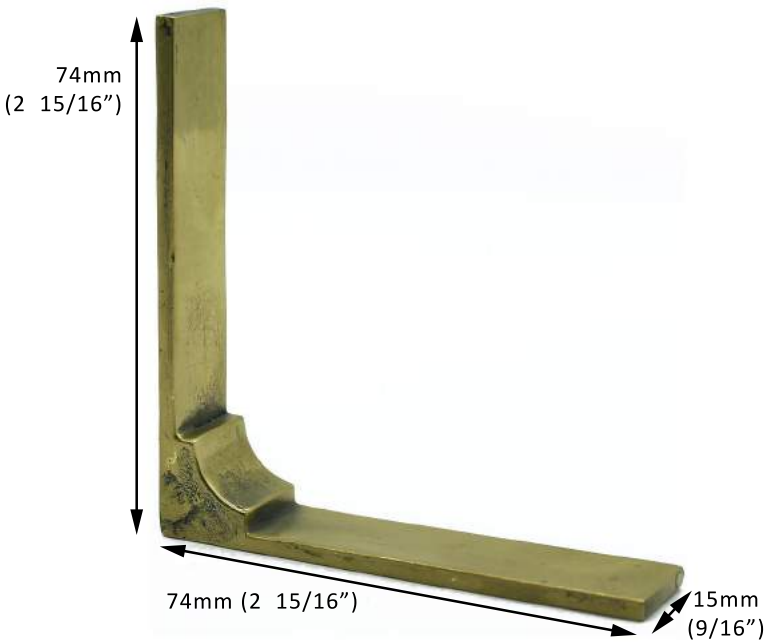
overall height 43mm (1 3/4") max. width 69mm (2 3/4")
this handle is cast without fixing threads which can be added to required specifications,
please ask for a quote

1770L

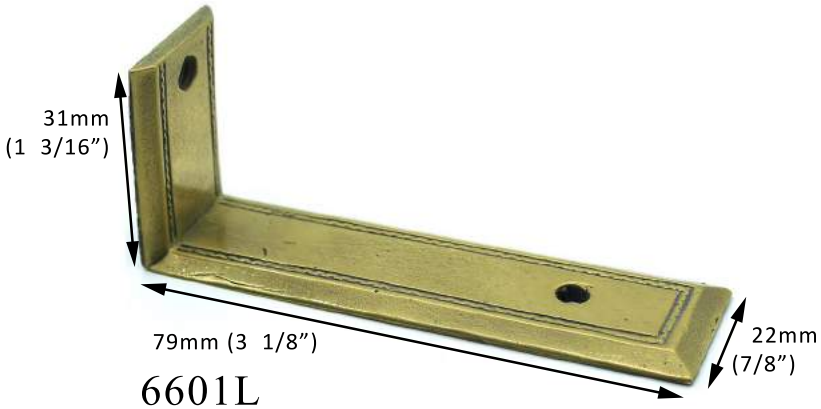
top view with
handle resting

plate width 50mm (1 15/16") max. plate length 53mm (2 1/16")
overall height with handle standing 43mm (1 3/4")
plate has 4 pin holes for surface mounting

BRACKETS, DOOR TURN & HOOK AND EYE



7365L



6601L

359L

measures
57mm (2 1/4")
x 16mm (5/8")

FOR MORE HOOKS AND EYES PLEASE VISIT OUR ONLINE SHOP

XW130ABL

for hook and eye together

hook: end to end 57mm (2 1/4")

or quote item C129
to buy eye only
and item C125
to buy hook only

eye: ext. dia. of eye 12mm (1/2")
total length 15mm (9/16")

7504L

overall length 81mm (3 3/16")
max. height 52mm (2 1/16")

internal measurement of
aperture is 4mm (5/32") square

7562L

overall length 83mm (3 1/4")
max. height 51mm (2")

internal measurement of
aperture is 4.5mm (3/16") square

7693L

overall length 90mm (3 9/16")
max. height 45mm (1 13/16")

internal measurement of
aperture is 4mm (5/32") square
